

Proposals F2-S

- A. The course time should be increased to 10 minutes (presently it is 7 minutes).
- B. The preparation time should be increased to 5 minutes (presently it is 2 minutes).
- C. The submersion time should be increased to 5 seconds (presently it is 3 seconds).
- D. Modification for the static evaluation of submarines:

If the model is from standard model kit or from Injected Plastic model kit:

D1 In the criterion "Amount of work" : if the model has no additional details/work, then it receives maximum 10 points. If it has extra details/work, then it can receive maximum 20 points. But this extra work should be supported with appropriate documents (e.g. photos, drawings) which the competitor presents to the judges.

D2 The criterion "Correspondence to the documentation" : the kit model which has the kit instructions only receives maximum 10 points. All the extra work/parts/details are to be positively evaluated if additional plans and other documents are presented. In this case additional 10 points can be given.

- E. Venue requirements.

The depth of the water should be at least 2 meters.

Bánk, 21.07.2019.
